## 3. What went well and what comes next

Strengths

Your attack from position 4: your approach is right and you also hit past the block. Your serve has become far more reliable: 18 errors instead of 29.

To work on next season

Passing a hard serve: you start moving too late. The second ball when the setter cannot get to it: play it high to position 4.

Personal goal for next season

Passing from a 3 to a 4: a hard serve still reaches the setter in a playable way.

A word from the coach

Maya, this season you went from substitute to a regular starter in attack. You came to almost every practice, also when things were tough, and the whole team saw it. Next season I am counting on you in serve receive.

**Using Koach?** When you finish the season, Download season report (CSV) gives you each player's attendance, average effort, points and matches played: the basis for section 1.
