

Sets on this sheet

1 2 3 4 5

Kept by

Tally each action in the player's row. **IN** = serve in play, no ace. **RUN** = most points in a row on one service turn (serve tracker on page 2). **PTS** = SA + K + BLK. **ERR** = SE + reception 0 + E + NET + OTH. Keeping stats on your own? Pick one or two skills per match.

Service turns and serve runs

Each time your team wins the serve, start a new box: the server's number on top, a tally mark below for every point won on that serve.

turn		1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24

How to fill it in

- 1. Does your team serve first or win the serve back? Write the server's number at the top of a new box.
- 2. Make a tally mark at the bottom for every point your team wins on that serve. When the rally is lost, the turn is over. A box without marks is fine.
- 3. After the match, find each player's box with the most marks. That number is the run: copy it to the RUN column on page 1.

After the match

PTS = SA + K + BLK
ERR = SE + reception 0 + E + NET + OTH
AVG = (3 × number of 3s + 2 × number of 2s + number of 1s) ÷ all receptions
S% = (SA + IN) ÷ (SA + SE + IN) × 100
Reception 0 = aced · 1 = out of system · 2 = settable · 3 = perfect to the setter
Team row = the sum of all players. For RUN the team's longest; work out AVG and S% again for the whole team.

Other box score abbreviations

TA total attacks · **A** assist · **RE** reception error (a 0 on this sheet) · **DIG** dig · **BS** / **BA** block solo / block assist. **K**, **E**, **SA** and **SE** mean the same as on this sheet.
Attack attempts and digs are not on this sheet: only track what you will actually use.

Rather not add it all up? In Koach you tap in live who scored, how, who made the error and the reception from 0 to 3; after the match, points and errors per player, the reception and the longest serve runs are ready.

Volleyball stat sheet

This is the sheet after a four-set match with every skill filled in. Names and numbers are made up.

Serve tracker, set 1 (the first twelve turns)

turn		1	2	3	4	5	6	7	8	9	10	11	12
Set 1	no.	7	4	9	3	11	14	7	4	9	3	11	14
	points												

- No. 7 won four points in a row on her own serve in set 1. That is her longest run, so the RUN column says 4.
- Check the team row: points 6 + 41 + 8 = 55, errors 12 + 4 + 16 + 5 + 3 = 40. If the player rows add up to the team row, you have not skipped anything.
- The libero (no. 1) does not serve in this example, so her serve boxes stay empty.
